

**With over a decade experience at RPI,
Brian is the veteran many clients
and team members rely on.**

RPI Senior Consultant

Brian Ayers

rpi@rpic.com

Measuring years for professional developers and programmers is a bit of a challenge, it's like adjusting for dog years! "10 years in my profession is like a lifetime in a lot of other jobs," Brian explains. "Innovations and progress in technology moves incredibly fast, and if you don't spend enough time keeping up then you can quickly become irrelevant." It's that kind of attitude that has made Brian such an important member of the RPI team.

Background and Experiences

Brian earned his Bachelor's degree in Computer Science from SUNY Brockport. He worked as a contractor for New York state in software implementation, helping to roll out a statewide Child Welfare Tracking System. At RPI, he is an Accounts Payable Automation specialist and leads our Kofax Support and Implementation projects. He brings extensive expertise with Kofax Capture, Kofax Transformation Modules, Lawson (AP Procurement) and Perceptive Content / ImageNow.

A Powerful Asset

In Brian's case, his long standing tenure at RPI Consultants is a unique and powerful asset. "I stay on the cutting edge of my industry," he explains. "but I also bring perspective that someone fresh out of college can't provide." Brian has a deeper understanding of exactly how businesses implement and rely on technology. "That's the secret," Brian says, "the key is understanding what our clients' worlds are like, what their pain points are, and to help them automate processes to become more efficient."

On a Personal Note

Brian is also a rarity in that when he goes on vacation, he fully unplugs. "I like to camp in the Adirondacks with my family and friends," he explains, "it's nice to be free from devices and get unplugged." Brian and his wife Emily also take great pride in their daughters, Adelaide and Felicity. Brian adds, "Any chance I get to spend with my girls is the best!"
