

There is nothing illogical about this Trekkie's passion for solving problems and making our clients' lives a little easier!

RPI Senior Consultant

Derreck Mayer

rpi@rpic.com

Like many other certified, self-proclaimed "geeks," Derreck Mayer is a big Star Trek fan. In fact, he created his own blog and podcast on the topic! If you spend time with Derreck, you'll notice his clear and measured tone evokes Star Teck's Mr. Spock. "I am a problem solver," Derreck says, "I love going into an organization, thinking logically through their processes, and then working to automate tasks to make our clients' jobs easier."

Background and Experiences

Derreck earned two degrees from the University of Kansas, a Bachelor's degree in Developmental Psychology with a minor in Philosophy, as well as a Master's of Science Degree in Educational Technology - a field focused on using technology in classrooms and training environments. He uses his education to quickly get clients up to speed on new software and solutions. Derreck began working with Perceptive Software in 2010 and has tremendous integration experience with many third party applications.

Spock's Logic

Derreck's cool, calm, Spock-esque demeanor comes in handy when he sits down with various department heads to help them through an ECM install or upgrade. "Many times, especially when multiple departments are using the same product, there is a battle over what should take priority and who should have ownership," he says. "My job is to get everyone together at the table to show they are the same team and that our overall goal is to improve processes for the organization as a whole."

Personal Passions

Aside from his fascination with Star Trek, Derreck created and runs his own podcast network called the Heroes Podcast Network. He produces three series and co-hosts two of them. These podcasts focus on various media, such as movies, television, and video games. He also attends comic conventions all over the country, and is a fan of the DC Universe.
