

Whether for his RPI team members,
or in the field helping a client,
John is the go-to person!

RPI Solution Delivery Manager

John Marney

rpi@rpic.com

Work long enough for any company, and you'll soon learn who the "go-to" person is. It's the person that is able to solve the most difficult problems, has the deepest knowledge, and who always comes through. At RPI, we consider that person to be John Marney.

Knowledge and Experience Run Deep

Whether at his college job working with Geek Squad, or during his time with Perceptive Software, John is a natural leader that people gravitate towards and instinctively rely on. When he joined RPI Consultants in 2013 it was no different, and he quickly become the resource the entire team looks to for product and solution information, and for personal and professional advice and direction. John has tremendous product experience, but he has a unique ability to dig into an industry and learn how to use technology to make lives and jobs easier. He can literally do anything, from implementations to custom code to technical troubleshooting, and that's why he is our Solution Delivery Manager.

Background and Experiences

John graduated with a Bachelor of Science in Business Administration from Kansas State University. "I learned a lot about the abstracts of system and data design," John explains, "I also got some very practical experience with system design." At RPI, John draws heavily on his tenure with Perceptive Software, "The best way to really understand a product is to listen to end users and their experience." It's that kind of approach that John uses to push technology to its fullest potential, and it's why he is our "Go-to Person!"

On a Personal Note

When John is not at work helping his clients and advising team members, he enjoys spending time with this wife and close friends playing board games, grilling out, and following his alma mater's football team. Go Cats!
