

Coming from the non-profit sector, Kate was happy to find similar values and a commitment to client partnerships at RPI.

RPI Project Manager, Prosci Change Management Certified

Kate Storm

rpi@rpic.com

Kate Storm has a truly incredible way of connecting processes, technology, and people to improve our clients' experiences and lives - which explains why she has been such a great addition to RPI and the PMO! "RPI builds authentic partnerships with clients that lead to more collaborative and effective work," Kate says, "and that really aligns with my background and values." Those values were forged working in the non-profit sector where Kate learned how critical client partnerships are, especially when projects may be light on resources. "It's clear to me that RPI really values every client," she says, "and that means we work hard to build true partnerships."

The People Side of Project Management

Kate recently completed her Prosci Change Management Certification and has really taken the lead on developing and piloting change management services integrated with RPI's more traditional project management. "Change management focuses on the people side of project management," Kate says, "and by helping people adjust to changes in processes and technology, we ensure our clients are getting the most from their investment." She recognizes that change is hard and there is always going to be some resistance, but she says "if we can help teams **lead** change instead of the change leading them, anything can happen!"

Background & Experiences

Along with her Prosci certification, Kate also holds a Bachelor's of Science from The Ohio State University and a Bachelor's of Fine Arts from Columbus College of Art & Design.

Downtime Pursuits

Kate stays about as busy outside the office as she does in the office. When not playing games, hunting for fossils, or making jewelry with her husband and two stepdaughters, Kate enjoys learning new techniques for making art, reading memoirs and science fiction, writing young adult fiction, and helping find homes for rescued cats!
