

"When you do what you love, you never work a day in your life..."

RPI Senior Developer

## Paul Brigden

[rpi@rpic.com](mailto:rpi@rpic.com)

Truth be told, that old adage perfectly describes Paul Brigden's outlook on life. You see, Paul loves programming and coding, but while the sheer act of what he does for a living gives him great joy, it's the knowledge that his work will have a positive impact on the lives of those who utilize his work that really makes him feel good. "I love my work at RPI because I get to work on interesting projects with great people and make our clients'

### Improving Clients' Worlds

Paul is proud to be part of the RPI team of consultants, and enjoys having an impact on the lives of clients. "I understand how important it is to harness the awesome power of technology and software, like Perceptive Content and OnBase, to help make our clients' lives easier and really affect their bottom line," explains Paul. "I love the fact that my work helps make their businesses more efficient and streamlined, which in turn makes their job easier and their lives better," he continues, "that's the biggest rush for me!"

### Programming a New ImageNow Web Interface

Paul earned a Computer Science Degree from City University of London. "My degree gave me a good understanding on how software must be developed, and I apply that everyday," says Paul. Paul is currently working on an important RPI product called Yoga, which is a lightweight HTML5 viewer for Perceptive Content / ImageNow. Yoga is easily and quickly deployable on any Perceptive Content web server and provides higher performance viewing and workflow interactions than the traditional WebNow client.

### Pastime and Hobbies

Paul resides in Athens, Greece, and when he's not passionately programming new products and solutions he loves taking his car on the long trip to Corinth to visit his parents. Usually he avoids the highways and just takes the back roads along the coast. "There's something really special about seeing the beauty of the sea while driving," he says.

#### Product Knowledge

Perceptive / ImageNow  
OnBase by Hyland  
Brainware by Hyland
